**RE: Small Mining Permit No. SP575 - Termination of Notice of Violation, Docket No. 5205-13 and Notice of Violation and Order, Docket No. 5217-13**

Dear Mr. Condos:

By letter dated January 10, 2014, the Land Quality Division acknowledged receipt of a check in the amount of \$42,233 from Sponenburgh & Company. The check was submitted to satisfy the bond increase requirement for Permit SP575 cited in the above-referenced DEQ enforcement actions.

Please be advised that the most pressing compliance issue at the pit has now been satisfactorily addressed. Notice of Violation Docket No. 5205-13, issued November 18, 2013, and Notice of Violation and Order Docket No. 5217-13, issued December 17, 2013, are hereby terminated. I am postponing enforcement of a failure to reclaim the pit until external legal issues regarding land ownership are resolved.

Your cooperation in this matter has been greatly appreciated. If you should have any questions regarding this correspondence, please feel free to contact me.

Sincerely,

John Erickson  
Assistant District II Supervisor  
Land Quality Division
